EDUCATION

Fr. Conceicao Rodrigues College of Engineering

Bachelor of Engineering (B.E.) in Computer Engineering

Bandra (West), Mumbai

CGPA: 8.79 | Expected Graduation, May 2027

EXPERIENCE

Virtue Crennovative Solutions

Full Stack Developer Intern

Nov 2025 – Apr 2026

- Analyzed user behavior and platform data across multiple client projects, identifying performance gaps and driving improvements in system efficiency
- Worked with structured databases (NeonDB, PostgreSQL, Firebase) writing queries to support data integrity and reporting across platforms

TEDxCRCE

Technical Lead

Jun 2025 – May 2026

- Designed and deployed scalable event infrastructure handling 1,200+ users, managing real-time ticket processing and system uptime during live events
- Led cross-functional tech team to deliver scalable, real-world event infrastructure from development to live execution

PROJECTS

KickstartCrypto – Web3 Crowdfunding Platform

kickstart-crypto-nine.vercel.app

- Built a decentralized Web3 crowdfunding platform on Ethereum (Sepolia) using Next.js 15, TypeScript, and Solidity, featuring milestone-based payouts and automated smart-contract refunds
- Engineered a dual-authentication full-stack app integrating Wagmi/Viem for Web3 wallets and NextAuth for Google logins, backed by NeonDB (PostgreSQL) and Supabase
- Created an automated email notification system and admin dashboard, tracking real-time on-chain events for users

AuthBlock — Blockchain-Based Academic Credential Verification

auth-block-iota.vercel.app

- Built a blockchain credential platform using Next.js, PostgreSQL, Solidity, and Ethereum (Sepolia) to issue tamper-proof degrees, marksheets, and course certificates across three on-chain smart contract registries
- Implemented AWS S3 storage, QR-code passports, OCR-based verification, and SHA-256 hash anchoring on Ethereum for real-time credential authenticity checks
- Delivered a full admin portal with bulk issuance, blockchain transaction tracking, QR-code Academic Passports, Firebase Storage, and a GitHub Actions CI/CD pipeline gating Vercel deployments

CityLedger — Smart Civic Issue Tracking Platform

cityledger-qm0r.onrender.com

- Built a full-stack civic complaint platform using Spring Boot, PostgreSQL, and JWT authentication with role-based access for Citizens, Field Workers, and Officers
- Anchored complaint data on Ethereum Sepolia via Web3j with SHA-256 hashing and AI-powered spam detection and severity classification using NVIDIA NIM (Llama 3.3 70B)
- Implemented real-time WebSocket officer alerts, community upvote escalation, GPS-based task routing, and AI duplicate detection across a social complaint feed

SKILLS

Programming Languages: C, C++, Java, JavaScript, Python, Solidity

Web Development: HTML5, CSS3, React.js, Next.js, Flask, Spring Boot

Databases: PostgreSQL, MySQL

Tools and Platforms: Git, GitHub, Docker, AWS, MS Excel

Core: Data Structures & Algorithms, OOP, REST APIs

ACHIEVEMENTS

Blue Star Scholarship Recipient

- Awarded the prestigious Blue Star Scholarship in recognition of consistent academic excellence, innovation, and all-round performance in engineering
