EDUCATION

Fr. Conceicao Rodrigues College of Engineering
B.E in Computer Engineering (CGPA: 8.79)

2023 - 2027
Mumbai, Maharashtra

EXPERIENCE

CS Infocomm Private Limited - Software Engineer Intern

Jul 2026 – Present

- Gained hands-on proficiency in agentic AI systems by designing multi-step agent workflows and state-based orchestration with LangGraph
- Integrated ChromaDB (vector retrieval) and FastAPI (agent serving) with LangGraph pipelines and automated workflows using n8n

Virtue Crennovative Solution - Full Stack Developer Intern

Nov 2025 – Apr 2026

- Built the seller-side platform for Articea, a home-made art products e-commerce marketplace, developing end-to-end features across frontend and backend using Next.js, TypeScript, and Node.js
- Designed SQL queries and managed data workflows for seller listings, order management, and reporting, improving operational efficiency and maintaining data accuracy across projects

TEDxCRCE - Technical Lead

Jun 2025 – May 2026

- Designed and built the Internship Expo website, coordinating with multiple teams to showcase company opportunities and driving 3.1K+ impressions and 150+ clicks through organic Google search
- Delivered an end-to-end ticketing and validation system, streamlining registration, automating e-ticket delivery, and improving event operations through QR-based entry verification

PROJECTS

KickstartCrypto - Web3 Crowdfunding Platform [Live Demo](#) | [GitHub](#)

- Architected a crowdfunding platform featuring automated payment workflows, user dashboards, and real-time notifications to enhance transparency and user experience
- Implemented secure authentication and user management systems using PostgreSQL and Supabase, ensuring reliable access control and data integrity
- Engineered automated notification workflows and an administrative dashboard for real-time monitoring, reporting, and user activity tracking

AuthBlock - Blockchain-Based Academic Credential Verification [Live Demo](#) | [GitHub](#)

- Built a blockchain credential platform using Next.js, PostgreSQL, Solidity, and Ethereum (Sepolia) to issue tamper-proof degrees, marksheets, and course certificates across three on-chain smart contract registries
- Implemented document verification workflows, cloud storage integration, and QR-based validation systems to ensure secure and accurate credential processing
- Created an administrative portal supporting bulk processing, credential tracking, and streamlined deployment workflows to boost operational efficiency

CityLedger - AI-Powered Civic Complaint Management System [Live Demo](#) | [GitHub](#)

- Developed a complaint management platform with role-based workflows for citizens, field workers, and officers, enabling efficient issue tracking and resolution
- Deployed AI-powered complaint classification and duplicate detection to enhance processing accuracy and reduce manual effort
- Configured real-time alerts, task routing, and duplicate detection mechanisms to streamline operational workflows and improve response efficiency

SKILLS

Programming Languages: C, C++, Java, JavaScript, TypeScript, Solidity, Python

Web Development: React.js, Next.js, Flask, Node.js, Spring Boot

Databases: PostgreSQL, MySQL

AI Engineering: LangGraph, FastAPI, ChromaDB, n8n

Tools and Platforms: Git, GitHub, Docker, AWS, MS Excel, Linux

Core: Data Structures & Algorithms, OOP, REST APIs, TCP/IP, Network Protocols

ACHIEVEMENTS

Mohan T Advani Centennial Scholarship Programme

- Awarded the prestigious Blue Star Scholarship in recognition of consistent academic excellence, innovation, and all-round performance in engineering
